Data in many forms. . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

Des données sous plusieurs formes. . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

CAUTIONARY NOTE ON DATA QUALITY - STRUCTURAL TYPE

The reporting of Structural Type of dwelling in any census or survey can be expected to be subject to potentially significant response error. This is perhaps due in part to the variety of sometimes complex structures, regional differences in terminology, and local real estate advertising. The level and nature of this error have been shown to vary according to the methodology used to collect the data. For the 1976 Census, the Structural Type was determined by the Census Representative. For the 1981 Census the Structural Type was determined by the respondent.

Analysis has shown that the 1976 data contained substantially fewer errors than the 1981 data for this variable. Comparisons between 1976 and 1981 Census data for Structural Type will therefore reveal certain inconsistencies. (Note: The count of dwellings is not in question, only how the total number of dwellings is broken down into Structural Type.) These inconsistencies will vary in degree from one geographic area to another and from one Structural Type to another.

Geographically the degree of error in dwelling classification is highest in the core areas of larger cities; those areas with older and converted or complex structures for which proper classification by respondents would be more difficult. The degree of error decreases as one moves outward from the core areas. Indeed there do not appear to be data quality problems in this regard for rural areas.

From the structural perspective the counts for Apartments in buildings with five or more storeys are believed to be relatively accurate. Counts for other types of dwellings in multiple unit structures (e.g., Apartments in buildings of less than five storeys and Row Houses), on the other hand, may contain varying degrees of error. For these dwellings there have been two types of misclassification. First, there are misclassifications among various types of the multiple unit structures. For example, Apartments in buildings of less than five storeys have frequently been classified as Row Houses, Semi-detached, etc. Second, there are some misclassifications between multiple and single structures. For example, a Duplex may have been misclassified as a Single Detached.

MISE EN GARDE AU SUJET DE LA QUALITÉ DES DONNÉES CONCERNANT LE TYPE DE CONSTRUCTION

La déclaration du type de construction d'un logement lors d'une enquête ou d'un recensement fait souvent l'objet d'erreurs de réponse importantes. La situation est sans doute attribuable en partie à la diversité des constructions quelquefois complexes, aux différences de terminologie d'une région à l'autre et à la publicité locale dans le domaine de l'immeuble. Il a déjà été prouvé que le niveau et la nature de cette erreur de réponse variaient selon la méthode utilisée pour recueillir les données. Au recensement de 1976, c'est le recenseur qui a établi le type de construction, alors qu'au recensement de 1981, le recensé s'en est chargé.

L'analyse a montré que les données de 1976 renfermaient beaucoup moins d'erreurs que celles de 1981 en ce qui concerne cette variable. Les comparaisons faites entre les données des deux recensements au sujet du type de construction révéleront donc certaines incohérences. (Nota: Le nombre de logements n'est pas remis en question, c'est seulement la façon de répartir le nombre total de logements selon le type de construction.) Ces incohérences varieront en importance d'une région géographique à l'autre et d'un type de construction à l'autre.

Au niveau géographique, le degré d'erreur dans le classement des logements est plus fréquent dans le centre des grandes villes; c'est en effet dans ces régions que l'on retrouve de vieilles constructions ou des édifices transformés ou complexes que les recensés ont bien du mal à classer. Le degré de l'erreur décroît à mesure que l'on s'éloigne du centre de la ville. En effet, il ne semble pas y avoir de problèmes de qualité de données à cet égard dans les régions rurales.

Du point de vue de la construction, le nombre d'appartements dans les immeubles de cinq étages ou plus est, croyons-nous, relativement exact. Le nombre d'autres genres de logements dans des constructions à logements multiples (par ex., des appartements dans des immeubles de moins de cinq étages et des maisons en rangée), peut par contre, renfermer ce genre d'erreur mais à des degrés divers. Nous avons relevé deux genres de classement erroné pour ces logements. En premier lieu, il y a eu classement erroné parmi les divers types de construction à logements multiples. Par exemple, des appartements dans des immeubles de moins de cinq étages ont fréquemment été classés comme maisons en rangée, maisons jumelées, etc. En second lieu, il y a eu erreur au niveau des constructions multiples et individuelles. Par exemple, un duplex a pu être classé par erreur comme une maison individuelle non attenante.

A substantial amount of the Structural Type error is misclassification among multiple unit structures. For this reason the user is advised to use the 1981 Census Structural Type data, whenever possible, by collapsing into four categories: Single Detached, Apartment in a building with five or more storeys, Movable (i.e. Mobile and Other Movable), and All Other. The error in the aggregated data will be reduced but it will not be eliminated. The misclassification of dwellings in multiple unit structures can be expected, where it occurs, to result in an under-reporting for the "All Other" category and a compensating overreporting for Single Detached. The significance of this error (as a percentage) in the count of Single Detached can be expected to decrease as the proportion of true Single Detached in the geographic area increases.

For many tabulations (Census Tract, Census Subdivision, Census Division, Census Metropolitan Area, Province level tabulations, as examples) it is possible (with some cross-reference to other 1981 Census information and to 1976 Structural Type data) to determine whether for the particular geographic area there is a data quality problem for Structural Type, the degree of this problem, and most probably how the data have been misclassified.

The procedure is based upon Period of Construction data. These data, which were collected on a sample basis in the 1981 Census, permit the identification of new construction - i.e. of occupied dwellings constructed in the period 1976-1980 plus those constructed in the first five months of 1981. To the extent that dwelling stock is stable (ideally no conversions and no demolitions) over a five-year period, then adding the new construction - obtained from the 1981 Census data - to the 1976 Census Structural Type counts should yield values close to those for the 1981 Census. While differing vacancy rates, demolitions and conversions (among other things) must be taken into consideration, the degree to which these adjusted counts do not agree with 1981 counts by Structural Type should give a clear indication of the quality of the data - both 1981 and 1976.

Three basic steps are involved in making this assessment of the quality of the data:

- (1) Ascertain the 1976 Census geographic area corresponding to the 1981 Census geographic area for which Structural Type data are being tabulated.

Une forte proportion de l'erreur du type de construction est survenue pour les constructions à logements multiples. Pour cette raison, l'utilisateur serait avisé, toutes les fois qu'il recourt aux données du recensement de 1981 sur le type de construction, de les regrouper si c'est possible selon les quatre catégories suivantes: maisons individuelles non attenantes, appartements dans un immeuble de cinq étages ou plus, logements mobiles (c.-à-d. les habitations mobiles et les autres logements mobiles) et tous les autres. L'erreur dans les données agrégées décroîtra mais elle ne sera pas éliminée. On peut s'attendre à ce qu'un classement erroné des logements dans des immeubles à logements multiples, lorsqu'il se produit, entraîne un sous-dénombrement de la catégorie "tous les autres" et un surdénombrement équivalent dans le cas des maisons individuelles non attenantes. On peut s'attendre à ce que l'importance (en pourcentage) de l'erreur au niveau du nombre de logements individuels non attenants diminue à mesure qu'augmentera le nombre "réel" de logements individuels non attenants dans la région en question.

Pour bon nombre de totalisations (par ex., au niveau des secteurs de recensement, subdivisions de recensement, divisions de recensement, régions métropolitaines de recensement et provinces), il est possible (avec certains recoupements à d'autres données du recensement de 1981 et aux données sur le type de construction de 1976) d'établir s'il y a un problème de qualité dans les données sur le type de construction pour une région géographique particulière, la nature du problème et, très probablement, la raison du classement erroné.

La méthode se fonde sur les données touchant la période de construction. Ces données, qui ont été recueillies auprès d'un échantillon au recensement de 1981, permettront d'identifier les constructions neuves, c'est-à-dire les logements occupés construits au cours de la période 1976-1980 ainsi que ceux qui ont été construits dans les cinq premiers mois de 1981. Dans la mesure où le stock de logements est stable (idéalement, il n'y aurait ni transformation ni démolition) au cours d'une période de cinq ans, si l'on ajoute la construction neuve - chiffres que l'on a obtenus au recensement de 1981 - aux chiffres sur le type de construction au recensement de 1976, on devrait pouvoir obtenir des valeurs assez près de celles qui ont été obtenues au recensement de 1981. Bien que les différents taux d'occupation, les démolitions et les transformations (entre autres) doivent être pris en considération, l'écart entre ces chiffres rectifiés et les chiffres de 1981 selon le type de construction devrait nous donner une indication claire de la qualité des données, tant pour 1981 que pour 1976.

L'évaluation de la qualité des données se fait en trois étapes:

- (1) S'assurer que la région géographique au recensement de 1976 correspond à celle du recensement de 1981 pour laquelle on a totalisé des données sur le type de construction.

- (2) Bring together, for the given geographic area (or areas), the 1976 and 1981 Structural Type data with the 1981 data cross-tabulated by Period of Construction (Sample data) and add counts for 1976-1981 Period of Construction to 1976 counts by Structural Type to produce "adjusted 1981 Counts". (The two 1981 Apartment categories must be added together for this purpose.)

- (3) Compare the 1981 Census counts by Structural Type with the adjusted 1981 Census counts by Structural Type and assess differences.

Period of Construction (for period 1976 to 1981) data cross-tabulated by Structural Type are being specially prepared for use in carrying out this procedure. (If there has been no new construction for the geographic area of interest then the Period of Construction data will not be needed and 1976 Structural Type data can be compared directly with the appropriate 1981 Structural Type data.) These tabulations and a more detailed description of the procedure with interpretative notes will be available upon request in March of 1983. See inside front cover on how to obtain more information.

Further information on the quality of the Structural Type data will be included in Data Quality - Total Population (Catalogue No. 99-904).

- (2) Regrouper, pour une ou des régions géographiques données, les chiffres de 1976 et de 1981 sur le type de construction aux recoupements de 1981 selon la période de construction (données échantillonnées) et ajouter les chiffres de la période de construction 1976-1981 aux chiffres de 1976 selon le type de construction, ce qui produira les chiffres rectifiés de 1981. (À cette fin, il faut additionner les chiffres des deux catégories de 1981 sur les appartements.)

- (3) Comparer les chiffres du recensement de 1981 sur le type de construction aux chiffres rectifiés de ce même recensement et évaluer la différence.

Les données sur la période de construction (pour la période 1976 à 1981) avec recoupements selon le type de construction sont préparées spécialement pour effectuer cette procédure. (S'il n'y a eu aucune construction neuve dans la région en question, les données sur la période de construction ne seront pas alors requises et les données de 1976 sur le type de construction pourront être comparées directement avec les données correspondantes de 1981.) On pourra obtenir sur demande en mars 1983 ces totalisations ainsi qu'une description plus détaillée de la procédure accompagnée de notes d'interprétation. Pour plus de renseignements, prière de se reporter au verso de la couverture avant.

D'autres renseignements sur la qualité des données portant sur le type de construction paraîtront dans le bulletin n° 99-904 au catalogue intitulé Qualité des données - Population totale.

INTRODUCTION

This report provides final statistics, from the 1981 Census, pertaining to occupied private dwellings and collective dwellings, at the Canada and/or province level.

Table 1 presents data on population in collective dwellings by type, for inmate and non-inmate, showing age and sex.

Table 2 presents data on population, occupied private dwellings, private households, census families and average number of persons per private household and per census family. Comparative data from the 1961, 1966, 1971 and 1976 Censuses are also shown in this table. It should be noted that the data from the 1971 Census are retrieved according to the 1976 and 1981 definition of private households, which excludes households outside Canada.

In Table 3, data for total occupied dwellings are shown according to urban size groups, rural non-farm and rural farm. Readers should note that the count for occupied collective dwellings in this table includes collective dwellings occupied by usual residents as well as collective dwellings occupied by foreign and/or temporary residents. This count, then, will not equal the count of "total collective dwellings" in Table 1, which refers to collective dwellings occupied by usual residents only.

Table 4 presents data on occupied private dwellings by tenure, showing structural type, urban size groups, rural non-farm and rural farm. In regard to the structural type of occupied private dwellings, data on "apartment five or more storeys" and "apartment less than five storeys" were collected for the first time in the 1981 Census, and are shown in this table.

Table 5 presents data on occupied private dwellings by structural type and tenure, showing number of persons per household, while Table 6 presents a cross-classification showing type of household.

DEFINITIONS

Dwelling. Refers to a set of living quarters in which a person or group of persons resides or could reside.

INTRODUCTION

Ce bulletin présente des statistiques définitives, tirées du recensement de 1981, sur les logements privés occupés et les logements collectifs, au niveau du Canada et (ou) des provinces.

Au tableau 1 figurent des données sur la population des logements collectifs selon le genre, le nombre de pensionnaires et le nombre de non-pensionnaires, par âge et sexe.

Le tableau 2 renferme des données sur la population, les logements privés occupés, les ménages privés, les familles de recensement ainsi que sur le nombre moyen de personnes par ménage privé et par famille de recensement. Il présente, en outre, des données comparatives tirées des recensements de 1961, 1966, 1971 et 1976. Soulignons que les données du recensement de 1971 sont extraites conformément à la définition adoptée en 1976 et en 1981 pour les ménages privés, laquelle exclut les ménages résidant en dehors du Canada.

Le tableau 3 présente des données pour l'ensemble des logements occupés, selon les régions urbaines par groupe de taille et les régions rurales non agricoles et rurales agricoles. Les lecteurs sont priés de noter que le nombre de logements collectifs occupés qui paraît dans ce tableau comprend autant ceux qui sont occupés par des résidents habituels que des résidents étrangers et (ou) temporaires. Ce nombre ne sera pas égal au "total des logements collectifs" figurant au tableau 1, qui ne prend en compte que les logements collectifs occupés par des résidents habituels.

Le tableau 4 renferme des données sur les logements privés occupés selon le mode d'occupation, par type de construction, pour les régions urbaines par groupe de taille et les régions rurales non agricoles et rurales agricoles. En ce qui a trait au type de construction des logements privés occupés, c'était la première fois en 1981 que l'on recueillait des données sur les "appartements de plus de cinq étages" et les "appartements de moins de cinq étages", et elles sont présentées dans ce tableau.

Le tableau 5 renferme des données sur les logements privés occupés selon le type de construction et le mode d'occupation, par nombre de personnes par ménage, alors que le tableau 6 présente un classement recoupé par genre de ménage.

DÉFINITIONS

Logement. Ensemble de pièces d'habitation qu'une personne ou un groupe de personnes habitent ou pourraient habiter.

DEFINITIONS - Continued

Private Dwelling. Refers to a structurally separate set of living quarters with a private entrance from outside or from a common hall, lobby, vestibule or stairway inside the building. The entrance to the dwelling must be one that can be used without passing through the living quarters of someone else. The census classifies private dwellings into REGULAR PRIVATE DWELLINGS and SEASONAL/MARGINAL DWELLINGS. Regular private dwellings are further classified into three major groups: OCCUPIED DWELLINGS (occupied by usual residents), UNOCCUPIED DWELLINGS, and DWELLINGS OCCUPIED BY FOREIGN AND/OR TEMPORARY RESIDENTS. Seasonal/marginal dwellings are classified as occupied by usual residents or by foreign and/or temporary residents. Unoccupied seasonal/marginal dwellings are not counted in the housing stock.

Occupied Private Dwelling. Refers to a private dwelling in which a person or group of persons is permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day. Unless otherwise specified, all data in housing reports are for occupied private dwellings rather than unoccupied private dwellings or dwellings occupied solely by foreign and/or temporary residents.

Regular Dwelling. Refers to a private dwelling which was built or converted for year-round (permanent) occupancy. These dwellings are classified into OCCUPIED DWELLINGS, UNOCCUPIED DWELLINGS and DWELLINGS OCCUPIED BY FOREIGN AND/OR TEMPORARY RESIDENTS.

Seasonal/Marginal Dwelling. Refers to a private dwelling which is unsuitable for year-round (permanent) occupancy; that is, it does not appear to have sufficient facilities to provide comfortable accommodation throughout the year (e.g., non-winterized cottages or cabins). Also included is any other dwelling that was not built or converted for year-round or permanent occupancy (e.g., unconverted barns or garages).

Private Dwelling Occupied by Foreign and/or Temporary Residents. Refers to a private dwelling solely occupied by foreign and/or temporary residents on Census Day. A TEMPORARY RESIDENT of a dwelling is a person who resides there on Census Day, but has a usual place of residence elsewhere in Canada. A FOREIGN RESIDENT is a person whose usual place of residence is outside Canada. These dwellings are classified into REGULAR DWELLINGS and SEASONAL/MARGINAL DWELLINGS.

DÉFINITIONS - suite

Logement privé. Ensemble structurellement distinct de pièces d'habitation ayant une entrée privée donnant sur l'extérieur ou sur un corridor ou un escalier commun à l'intérieur, c'est-à-dire que l'entrée doit donner accès au logement sans qu'on ait à passer par les pièces d'habitation de quelqu'un d'autre. Aux fins du recensement, on classe les logements privés en LOGEMENTS PRIVÉS ORDINAIRES et en LOGEMENTS SAISONNIERS/MARGINAUX. Les logements privés ordinaires se subdivisent en trois grandes catégories: les LOGEMENTS OCCUPÉS (par les résidents habituels), les LOGEMENTS INOCCUPÉS et les LOGEMENTS OCCUPÉS PAR DES RÉSIDENTS ÉTRANGERS ET (OU) TEMPORAIRES. Les logements saisonniers/marginaux sont classés comme logements occupés par les résidents habituels ou comme logements occupés par des résidents étrangers et (ou) temporaires. Les logements saisonniers/marginaux inoccupés ne font pas partie du stock immobilier.

Logement privé occupé. Logement privé occupé de façon permanente par une personne ou un groupe de personnes. Sont également inclus dans cette catégorie les logements privés dont les résidents habituels sont temporairement absents le jour du recensement. Sauf indication contraire, toutes les données présentées dans les publications sur le logement se rapportent aux logements privés occupés et non à des logements privés inoccupés ou à des logements occupés par des résidents étrangers et (ou) temporaires.

Logement ordinaire. Logement privé construit ou transformé pour être habité à l'année ou en permanence. Ces logements sont classés comme LOGEMENTS OCCUPÉS, LOGEMENTS INOCCUPÉS et LOGEMENTS OCCUPÉS PAR DES RÉSIDENTS ÉTRANGERS ET (OU) TEMPORAIRES.

Logement saisonnier/marginal. Logement privé qui ne peut être habité à l'année ou en permanence, c'est-à-dire que les installations nécessaires au confort durant toute l'année sont insuffisantes (par ex., les chalets d'été, les pavillons non hivernisés). Cette catégorie comprend aussi tout logement qui n'a pas été construit ou transformé pour être habité à l'année ou en permanence (par ex., les granges ou garages non transformés en habitations).

Logement privé occupé par des résidents étrangers et (ou) temporaires. Logement privé occupé uniquement par des résidents étrangers et (ou) temporaires le jour du recensement. Le RÉSIDENT TEMPORAIRE d'un logement est une personne qui habitait ce logement le jour du recensement, mais dont le domicile habituel se trouve ailleurs au Canada. Un RÉSIDENT ÉTRANGER est une personne dont le domicile habituel est à l'extérieur du Canada. Ces logements sont classés comme LOGEMENTS ORDINAIRES et comme LOGEMENTS SAISONNIERS/MARGINAUX.

DEFINITIONS - Continued

Collective Dwelling. Refers to a dwelling of a commercial, institutional or communal nature. It may be identified by a sign on the premises or by a Census Representative speaking with the person in charge or with a resident or a neighbour, etc. Included are hotels, motels, tourist homes, nursing homes, hospitals, staff residences, communal quarters of military camps, work camps, jails, missions, rooming- or lodging-houses, and so on. Collective dwellings may be occupied by usual residents or solely by foreign and/or temporary residents.

Structural Type. Refers to the structural arrangements of the dwelling.

Single House (or Single Detached)

Refers to a single dwelling not attached to any other building and surrounded on all sides by open space.

Semi-detached or Double House

Refers to one of two dwellings attached side by side but not attached to any other building and surrounded on all other sides by open space.

Duplex

Refers to one of two dwellings, one above the other, not attached to any other building and surrounded on all sides by open space.

Row House

Refers to one of three or more dwellings joined side by side but not having any other dwellings either above or below.

Apartment in a Building That Has Five or More Storeys

Refers to a dwelling unit in a high-rise apartment building.

Apartment in a Building That Has Less Than Five Storeys

Refers to a dwelling unit in a triplex, quadruplex or a dwelling unit in a non-residential building or in a house that has been converted.

House Attached to a Non-residential Building

Refers to a single dwelling attached at ground level to another building (such as a store, etc.) but separated from it by a common wall running from ground to roof.

DÉFINITIONS - suite

Logement collectif. Institution ou établissement commercial ou communautaire qui s'affiche comme tel ou que le recenseur peut identifier comme tel en s'adressant à la personne qui en a la charge, à un résident, à un voisin, etc. Sont inclus dans cette catégorie les hôtels, les motels, les maisons de chambres pour touristes, les maisons de repos, les hôpitaux, les résidences de personnel, les casernes de camps militaires, les camps de chantier, les prisons, les centres d'accueil, les pensions et maisons de chambres, etc. Il peut s'agir d'un logement occupé par des résidents habituels ou uniquement par des résidents étrangers et (ou) temporaires.

Type de construction. Type de construction du logement.

Maison individuelle (ou logement individuel non attenant)

Logement individuel non attenant à une autre construction et entouré d'espaces libres.

Maison jumelée ou maison double

Deux logements côte à côte réunis par un mur commun, mais non attenants à une autre construction, et entourés d'espaces libres.

Duplex

Deux logements superposés non attenants à une autre construction et entourés d'espaces libres.

Maison en rangée

Logement dans une rangée d'au moins trois logements réunis côte à côte sans autre logement au-dessus ou en dessous.

Appartement dans un immeuble de cinq étages et plus

Logement dans une tour d'habitation.

Appartement dans un immeuble de moins de cinq étages

Logement dans un triplex ou un quadruplex, dans une construction non résidentielle ou dans une maison qui a été transformée.

Maison attenante à une construction non résidentielle

Logement individuel attenant au niveau du sol à une autre construction, par ex., un magasin, mais qui en est séparé par un mur commun s'élevant du sol au toit.

DEFINITIONS - Continued

Mobile Home

Refers to a dwelling which has been designed and constructed to be transported on its own chassis and capable of being moved on short notice.

Other Movable Dwelling

Refers to a dwelling such as a tent, travel trailer, railroad car or houseboat.

Private Household. Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

Household Type. Refers to the basic division of private households into FAMILY and NON-FAMILY HOUSEHOLDS. FAMILY HOUSEHOLD refers to a household that contains at least one census family (e.g., persons living in the same dwelling who have a husband-wife or parent-never-married child relationship). ONE-FAMILY HOUSEHOLD refers to a single census family that occupies one private dwelling. The family may be that of the household reference person or one living as a related, lodging or other type of family with a household reference person who is a non-family person. A MULTIPLE-FAMILY HOUSEHOLD is one in which two or more census families occupy the same private dwelling. One family may be that of the household reference person, or the household reference person may be a non-family person with whom two or more census families are residing.

NON-FAMILY HOUSEHOLD refers to one person who lives alone in a private dwelling, or to a group of persons who occupy a private dwelling and do not constitute a census family.

Household Size. Refers to the number of persons in a PRIVATE HOUSEHOLD.

Tenure. Refers to whether some member of the household owns or rents the dwelling.

A dwelling is classified as "owned" even if it is not fully paid for, such as one which has a mortgage or some other claim on it. The dwelling may be situated on rented or leased land or be part of a condominium (whether registered or unregistered).

A dwelling is classified as "rented" even if it is provided without cash rent or at a reduced rent or if the dwelling is part of a co-operative. For census purposes, in a co-operative all members jointly own the co-operative and occupy their dwelling units under a lease agreement.

DÉFINITIONS - suite

Habitation mobile

Logement conçu et construit pour être transporté sur son propre châssis et qu'on peut déplacer sans grand délai.

Autre logement mobile

Logement tel qu'une tente, une roulotte de voyage, une voiture de chemin de fer ou un bateau-maison.

Ménage privé. La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

Genre de ménage. Répartition fondamentale des ménages privés en MÉNAGES FAMILIAUX et en MÉNAGES NON FAMILIAUX. Un MÉNAGE FAMILIAL est un ménage qui comprend au moins une famille de recensement, par exemple des personnes qui habitent le même logement et qui ont des liens conjugaux (époux-épouse) ou des liens de filiation (parent et enfant jamais marié). Un MÉNAGE UNIFAMILIAL se compose d'une seule famille de recensement qui occupe un logement privé. Il peut s'agir de la famille de la personne repère du ménage ou d'une famille apparentée, d'une famille chambreuse ou de tout autre genre de famille vivant avec une personne repère hors famille. Un MÉNAGE MULTIFAMILIAL se compose de deux familles de recensement ou plus qui occupent le même logement privé. Une de ces familles peut être celle de la personne repère du ménage ou il peut s'agir d'une personne repère hors famille vivant avec deux familles de recensement ou plus.

Un MÉNAGE NON FAMILIAL est constitué d'une personne qui vit seule dans un logement privé ou d'un groupe de personnes qui partagent un seul logement privé, mais ne forment pas une famille de recensement.

Taille de ménage. Nombre de personnes dans un MÉNAGE PRIVÉ.

Mode d'occupation. Indique si le logement est possédé ou loué par un membre du ménage.

Un logement est classé "possédé" même s'il est hypothéqué ou grevé d'une autre créance. Le logement peut être situé sur un terrain donné ou pris en location, ou encore faire partie d'un condominium enregistré ou non.

Un logement est classé "loué" même s'il est donné en location sans loyer en argent ou à un loyer réduit, ou qu'il fait partie d'une coopérative. Aux fins du recensement, tous les membres d'une coopérative ont des parts dans cette coopérative et occupent leur logement en vertu d'un bail.

DEFINITIONS - Continued

Census Family. Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in the census family tables.

Inmate. Refers to a resident of an "institutional" collective dwelling, other than staff members and their families.

Age. Refers to age at last birthday (as of the census reference date, June 3, 1981). This variable is derived from date of birth.

Date of Birth. Refers to the day, month and year of birth, collected for the purpose of determining the person's age as of the census reference date. Persons who were unable to give the exact date of birth were asked to give the best possible estimate.

Urban Population. Refers to persons living in an area having a population concentration of 1,000 or more and a population density of 400 or more per square kilometre.

Urban Population Size Group. Refers to the classification used in tabulations where the urban areas are distributed according to the following size groups:

| | |
|----------|----------|
| 1,000- | 2,499 |
| 2,500- | 4,999 |
| 5,000- | 9,999 |
| 10,000- | 29,999 |
| 30,000- | 99,999 |
| 100,000- | 499,999 |
| 500,000 | and over |

Urban areas are defined using population data from the previous census. It can therefore occur that an area meeting the criteria and defined as urban according to the population data of the 1976 Census will contain fewer than 1,000 people according to the 1981 Census. Where this occurs the population is assigned to the urban population size group 1,000 to 2,499.

Rural Population. Refers to persons living outside "Urban Areas".

Rural Non-farm Population. Refers to all persons living in rural areas and who are not members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural non-farm population was defined as all persons living in rural areas in dwellings other than those situated on census farms.

DÉFINITIONS - suite

Famille de recensement. Époux et épouse (avec ou sans enfants jamais mariés, peu importe leur âge) ou un parent seul (peu importe son état matrimonial) avec un ou plusieurs enfants jamais mariés (quel que soit leur âge) vivant dans le même logement. Aux fins du recensement, les personnes vivant en union libre sont considérées comme "actuellement mariées", peu importe leur état matrimonial légal; elles figurent donc comme une famille époux-épouse dans les tableaux sur la famille de recensement.

Pensionnaire d'institution Résident d'une institution (logement collectif), autre qu'un membre du personnel et sa famille.

Âge. Âge au dernier anniversaire de naissance (à la date de référence du recensement, le 3 juin 1981). Cette variable est établie d'après la réponse à la question sur la date de naissance.

Date de naissance. Jour, mois et année de naissance aux fins d'établissement de l'âge du recensé au jour du recensement. Les personnes qui ne connaissaient pas la date exacte de leur naissance devaient donner la meilleure estimation possible.

Population urbaine. Personnes demeurant dans une région qui a une concentration démographique de 1,000 habitants et plus, et une densité de population de 400 habitants ou plus au kilomètre carré.

Groupe de taille de la population urbaine. Classement utilisé dans les tableaux où la répartition des régions urbaines est indiquée selon les groupes de taille suivants:

| | |
|----------|---------|
| 1,000- | 2,499 |
| 2,500- | 4,999 |
| 5,000- | 9,999 |
| 10,000- | 29,999 |
| 30,000- | 99,999 |
| 100,000- | 499,999 |
| 500,000 | et plus |

Les régions urbaines sont définies à partir des données démographiques du recensement précédent. Il peut arriver qu'un territoire répondant aux critères et défini comme urbain selon les données démographiques du recensement de 1976 contienne moins de 1,000 personnes selon les résultats du recensement de 1981. Dans ce cas la population de ce territoire fera partie du groupe de taille de la population urbaine 1,000 à 2,499.

Population rurale. Toutes les personnes vivant à l'extérieur des régions urbaines.

Population rurale non agricole. Toutes les personnes qui vivaient dans une région rurale mais n'étaient pas membres de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale non agricole comprenait toutes les personnes vivant dans une région rurale et habitant un logement situé ailleurs que dans une ferme de recensement.

DEFINITIONS - Concluded

Rural Farm Population. Refers to all persons living in rural areas who are members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural farm population was defined as all persons living in rural areas in dwellings situated on census farms.

CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly.

SAMPLING

The 1981 Census data were collected either on a 100% basis (i.e. from all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 100% basis. All table headings are noted accordingly.

DATA QUALITY

Introduction

Any census data will be subject to error. Some of the errors will tend to cancel out over a large number of cases (i.e. for larger cells) as errors will be made in both directions (i.e. random errors). In general the proportion or rate of these random errors increases as the population or cell size decreases. Thus, small data values, even though collected on a 100% basis, should be used with some caution.

DÉFINITIONS - fin

Population rurale agricole. Toutes les personnes demeurant dans des régions rurales, qui font partie de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale agricole comprenait toutes les personnes vivant dans des logements situés dans des fermes de recensement dans des régions rurales.

CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publiés dans le présent rapport ont subi un arrondissement aléatoire qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme de pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total des éléments. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies. Les renvois au bas des tableaux avertissent l'utilisateur en conséquence.

ÉCHANTILLONNAGE

Les données du recensement de 1981 ont été recueillies sur une base de 100 % (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis selon la première méthode. Tous les titres des tableaux ont été annotés en conséquence.

QUALITÉ DES DONNÉES

Introduction

Dans tout recensement, les données recueillies peuvent être entachées d'erreurs. Certaines de ces erreurs tendent à s'annuler à mesure que le nombre de cas observés augmente (c'est-à-dire dans le cas des classes plus importantes) puisque les erreurs se font dans les deux sens (erreurs aléatoires). De façon générale, la proportion ou le taux d'erreurs aléatoires augmente au fur et à mesure que la taille de la population ou de la classe diminue. Aussi, faut-il utiliser avec une certaine réserve les petits chiffres obtenus, même si ces données ont été recueillies auprès de l'ensemble de la population.

Other of the errors will tend not to cancel out as errors will have a tendency to occur in one direction more than another (systematic errors, for example, question wording which invites errors in one direction more than in the other) and will result in a bias.

The data contained in this bulletin are subject to coverage errors, response errors and to processing errors.

Coverage Error

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1976 Census to measure the extent of the bias due to undercoverage. This study estimated the overall undercoverage rate to be of the order of 2% of the total population for persons and 2% for households. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults and recent immigrants. Similar trends were obtained in connection with the 1971 Census.

A comparable study was undertaken for the 1981 Census but the results were not available at the time this report was published.

Response Error

A response error occurs when the response recorded is incorrect. Such errors may occur due to the respondent misinterpreting the question, inadvertently checking the wrong box, or even consciously checking the wrong box. Contributing to this error may be the questionnaire wording or organization, or the training and attitude of enumerators.

Processing Error

Processing errors can occur when write-in answers are coded, when responses on the questionnaire are transcribed to be read by the computer, and when imputations are done either for non-response or for edit rejects.

A comprehensive assessment of the quality of the census data collected on a 100% basis will be included in Data Quality - Total Population publication (Catalogue No. 99-904).

Dans d'autres cas, les erreurs ne s'annulent pas parce qu'elles ont tendance à se produire dans un sens plutôt que dans un autre. Il s'agit d'erreurs systématiques. Par exemple, le libellé d'une question peut favoriser les erreurs dans un sens particulier. Ces erreurs entraînent un biais.

Des erreurs d'observation, des erreurs de réponse et des erreurs de traitement ont pu influencer sur la qualité des données fournies dans le présent bulletin.

Erreur d'observation

Il y a erreur d'observation au recensement lorsqu'on oublie complètement une personne ou un ménage ou qu'on le compte plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, de telles erreurs produisent un biais vers le bas dans les statistiques du recensement, de sorte que les estimations publiées du recensement tendent à sous-estimer le chiffre réel de population.

On a entrepris une étude spéciale sur le recensement de 1976 afin d'évaluer le biais entraîné par le sous-dénombrement. Selon les résultats, le taux global du sous-dénombrement serait de 2 % de l'ensemble de la population dans le cas des particuliers et de 2 % pour les ménages. L'étude a révélé que le sous-dénombrement est plus élevé dans certains groupes de la population, par exemple chez les jeunes adultes de sexe masculin et les nouveaux immigrants. On avait décelé les mêmes tendances lors du recensement de 1971.

Une étude similaire a été entreprise pour le recensement de 1981, mais les résultats n'étaient pas accessibles au moment de la parution du présent bulletin.

Erreur de réponse

Une erreur de réponse se produit lorsque la réponse enregistrée est incorrecte. De telles erreurs surviennent lorsque le répondant a mal interprété la question ou a coché la mauvaise case par inadvertance ou même volontairement. La formulation des questions ou le mode de présentation du questionnaire ainsi que la formation et l'attitude des agents recenseurs sont des facteurs qui peuvent favoriser ce genre d'erreurs.

Erreur de traitement

Des erreurs de traitement peuvent se produire lorsque des réponses en toutes lettres sont codées, lorsque les réponses du questionnaire sont transcrites en langage d'ordinateur et lorsqu'on fait des imputations pour tenir compte soit de la non-réponse soit des rejets au contrôle.

Une évaluation détaillée de la qualité des données du recensement recueillies sur une base intégrale sera présentée dans la publication Qualité des données - Population totale (n° 99-904 au catalogue).

SPECIAL NOTES

Structural Type Data

Users are advised that comparisons of structural type data with previous censuses should be approached with caution. Also, due to response bias in classifying certain structural types in the 1981 Census, the data for Single attached (semi-detached or double, row house, house attached to a non-residential building), Apartment less than 5 storeys, and Duplex should be used as one aggregate type, namely, Other Multiple Dwellings, as presented in the table(s) in this bulletin. More information concerning the nature of the problem and the conditions under which the data may be used with more confidence will be contained in Data Quality - Total Population (Catalogue No. 99-904).

Type of Household Data

Due to a change in the method of determining family type, implemented for the 1981 Census, caution should be used in comparing the distribution of primary and secondary families with data from previous censuses. Since the delineation of type of household is dependent upon family type, the same caution should be exercised in comparing the 1981 data for secondary family households with the corresponding figures in previous censuses.

An explanation of these changes, and if applicable, the impact of such changes on the data for household type in general, will be included in the Summary Guide - Total Population (Catalogue No. 99-902).

Rural Farm Population

It is quite probable that the counts shown for "rural farm population" are below the 1976 counterparts due to the more exclusive nature of the 1981 definition - see "Rural Farm Population" in the definition section.

REFERENCE PRODUCTS

The 1981 Census Dictionary (Catalogue No. 99-901) contains the complete range of definitions for all variables and terms used in the 1981 Census data products. Of general interest would be information contained in Summary Guide - Total Population (Catalogue No. 99-902) and Summary Guide - Sample Population (Catalogue No. 99-903) which include lists and indexes of tables appearing in the data publications, as well as reproductions of the census questionnaire forms and basic indicators of data quality. Further details on the data quality may be obtained from Data Quality - Total Population (Catalogue No. 99-904) and Data Quality - Sample Population (Catalogue No. 99-905).

NOTES SPÉCIALES

Données sur le type de construction

Les usagers devront user de prudence lorsqu'ils compareront les données sur le type de construction avec celles des recensements précédents. En outre, par suite du biais de réponse dans la classification de certains types de construction au recensement de 1981, les données sur les logements individuels attenants (maisons jumelées ou doubles, maisons en rangée, maisons attenantes à une construction non résidentielle), les appartements dans un immeuble de moins de 5 étages et les duplex doivent être considérés comme appartenant à un seul groupe, c'est-à-dire autres logements multiples, comme on le présente dans le(s) tableau(x) de ce bulletin. Pour plus de renseignements sur la nature de ce problème et sur la façon d'utiliser les données, prière de consulter la publication Qualité des données - Population totale (n° 99-904 au catalogue).

Données sur le genre de ménage

À cause d'un changement introduit en 1981 dans la façon de déterminer le genre de famille, nous recommandons aux utilisateurs de se montrer prudents lorsqu'ils comparent les données relatives aux familles principales et secondaires à celles des recensements antérieurs. Puisque le genre de ménage découle, en partie, du genre de famille, les mêmes précautions devraient être prises en comparant les données de 1981 sur les ménages de famille secondaire.

On peut trouver une explication de ces changements et, selon le cas, de l'impact de ces derniers sur les données relatives au genre de ménage en général, dans la publication Guide sommaire - Population totale (n° 99-902 au catalogue).

Population rurale agricole

Il est fort probable que les chiffres de la "population rurale agricole" soient inférieurs à ceux de 1976 en raison de la nature plus restrictive de la définition de 1981 - voir "Population rurale agricole" dans la partie des définitions.

PRODUITS DE RÉFÉRENCE

Le Dictionnaire du recensement de 1981 (n° 99-901 au catalogue) donne les définitions de toutes les variables et de tous les termes utilisés dans les produits du recensement de 1981. Les renseignements que renferment le Guide sommaire - Population totale (n° 99-902 au catalogue) et le Guide sommaire - Population-échantillon (n° 99-903 au catalogue), présentent un intérêt général puisqu'ils donnent la liste et l'index de tous les tableaux des publications ainsi qu'une reproduction des questionnaires du recensement et les indicateurs de base de la qualité des données. On peut obtenir plus de détails sur la qualité des données dans Qualité des données - Population totale (n° 99-904 au catalogue) et Qualité des données - Population-échantillon (n° 99-905 au catalogue).

NOTE: CALCULATIONS BASED ON UNROUNDED DATA. - NOTA: LES CALCULS SONT BASES SUR DES DONNEES NON ARRONDIES.

(1) IN 1971, THE DIFFERENCE BETWEEN THE OCCUPIED PRIVATE DWELLINGS AND THE PRIVATE HOUSEHOLDS IS DUE TO THE EXCLUSION OF DWELLINGS OCCUPIED BY HOUSEHOLDS OUTSIDE CANADA. IN 1976 AND 1981, BOTH HOUSEHOLDS OUTSIDE CANADA AND THEIR DWELLINGS ARE EXCLUDED. - EN 1971, LA DIFFERENCE ENTRE LES LOGEMENTS PRIVES OCCUPES ET LES MENAGES PRIVES PROVIENT DE L'EXCLUSION DES LOGEMENTS OCCUPES PAR LES MENAGES VIVANT A L'EXTERIEUR DU CANADA. LES MENAGES VIVANT A L'EXTERIEUR DU CANADA ET LEURS LOGEMENTS RESPECTIFS SONT EXCLUS EN 1976 ET EN 1981.

(2) IN 1976 AND 1981, FAMILIES AND PERSONS IN FAMILIES, IN COLLECTIVE HOUSEHOLDS AND IN HOUSEHOLDS OUTSIDE CANADA ARE EXCLUDED. - EN 1976 ET 1981, LES FAMILLES ET LES PERSONNES FAISANT PARTIE DES FAMILLES DES MENAGES COLLECTIFS ET DES MENAGES VIVANT A L'EXTERIEUR DU CANADA NE SONT PAS PRISES EN COMPTE.
